

Please, I urge you to reject NAB's petition 04-160 attempt to ban satellite radio's XM Instant Traffic & Weather. where else can you get what you need immediately--when you're driving in your car? Or in your home, for that matter. Aren't we censored enough????Everytime we, the taxpayers, get a break or find something that really works for us..someone higher up tries to dismantle it. Give us a break, please!!
